PRASHANT KUMAR PRASAD

AI ML Engineer

kr.prashant94@gmail.com +91 8083555868 Bangalore - 560100, India aruco.in
waytoprashant krprashant94

Experienced AI Engineer with 3+ years in emerging technologies. Proven track record in chatbots, LLM, classification, and ML modeling. Skilled in Python, GCP, and deep learning. Certified in ML, Python, and GCP. Effective communicator and leader with strong analytical skills.

THINGS I KNOW

Machine Learning and Large language model (LLM)

- Machine learning algorithm like XGBoost, LightGBM, ResNet, MobiNet, VGG, Vector Mapping, Tokenization
- Proven skill on supervised classification, recommendation, forecasting and chat-bot design.
- Experienced of OpenAI ChatGPT, Langchain and Higgingface API. Skilled on creating LLM based Telegram and WebEx chat-bot.
- Experienced in low level design algorithm of language models.

Google Cloud Platform

- Worked closely with the client manager to mange cloud resource for cost optimization.
- Experienced in Google Cloud services like BigQuery, VertexAI, Compute Engine.

Pipeline Tools

- Utilization of Airflow for AIML pipeline automation.

Python

- Solving sophisticated business requirement using simple algorithm.
- Python library like pandas, numpy, nltk, gensim, spaCy, TensorFlow, Keras, OpenCV

EXPERIENCE

Infosys Limited

Digital Specialist Engineer

Sep-2020 – Ongoing Bangalore, India

- Managing 5 Vertex AI machine and 10 VM in Google Cloud for different business requirements.
- Designed 20+ Airflow DAG for various data refresh and automation.
- Leveraged Airflow, VertexAI, Pipeline, Model Registry, and Compute Engine technology in Google Cloud to deploy ML models.
- Implemented and deployed multiple conversational chatbots(NLP/NLU) to fulfill various business requirements.
- Implemented a AI classifier, that classify 8000 classes on 8-35M data-set. Resulting the reduce of manual process by 70%.
- Deployed machine learning model in Google Cloud Storage Bucket for sales forecasting.
- Successfully deployed a scalable model for resume ranking, and matching against job descriptions, enhancing efficiency for job hiring team (Word2Vec, Keras, Ontology).
- Bug hunting and optimization on existing application.
- Communication with client and stakeholders to understand business requirement and formulating the problem statement. Presenting business solution to client.
- Documented technical workflow and high level non-technical explanation for solution that I created. Additionally, documented source code, comments in clean code (PEP8 style guide).
- On-boarding familiarization of application we are working, to newly hired employee.
- Interviewing technical competency on AIML of candidates and on-boarding familiarization to our environment.
- Won quarterly award 2 times for innovative solution.

TATA Sponge and Iron Limited

Intern

Jun-2019 – July-2019 Jamshedpur, India

- Designed and developed a user-friendly portal enabling employees to efficiently request transport services and track the availability of transport vehicles.
- Thoroughly analyzed user requirements and implemented a secure, scalable, reliable, and user-friendly interface to ensure optimal usability and satisfaction.

Projects

Resume Ranking Engine

Infosys Internal Tool — Human Resource Domain

- Designed and implemented a fair, transparent, scalable, accountable and reliable AI for sorting resumes based on job description that organization receive every day from different sources.
- The developed system can rank resume against job requirements or display best job opening against resume.

Transaction classification

Client: Cisco Systems, Inc. — Finance(FinOps) Domain

- A supervised algorithm to map the transaction line into sales representative for efficient commission crediting.
- Large number (6000-8000) of output class classification.

Support Ticket Chat-Bot's

Client: Cisco Systems, Inc. — Business Process Management Domain

- Multiple chatbot that can answer query based on available information in database.
- Sending deadline alert message to Business Process Person, to get updated and smooth client experience.

Other

- A telegram chat-bot to introduce conversational AI(LLM) understanding https://t.me/krprashantbot (Android/Mac only).
  Tech Stack : Python, FastAPI, OpenAI, Langchain
- A telegram chat-bot to get stock forcasting https://t.me/drinvestorbot (Android/Mac only).
  Tech Stack : Python, Keras, FastAPI, Ngnix, GCP Tech Stack : Python, FastAPI, React, MySQL, OpenCV, Keras, Ngnix, GCP, SSL, Airflow

EDUCATION

B. Tech. in Computer Science and Engineering

RCC Institute of Information Technology (Maulana Abul Kalam Azad University of Technology)

2016 – 2020 Kolkata, India

B. Tech. Thesis: *"Word Recognition on Indic Script"*
DGPA: 8.33

Intermediate in Science

Mrs. K M P M Inter College (Jharkhand Academic Council)

2014 – 2016 Jamshedpur, India

Percentage: 75.4%

CERTIFICATION

- Infosys Certified Machine Learning Associate
- Infosys Certified Python Associate
- Infosys Certified Google Cloud Associate
- Google Cloud Digital Leader
- Azure Data Fundamentals
- Azure AI Fundamentals
- Azure Fundamentals

SKILLS

Python | Machine Learning | Google Cloud Platform | BigQuery | VertexAI | LLM | OpenAI | Keras | Airflow

Cloud Technology: VertexAI, BigQuery, Cloud Storage, Compute Engine, Google Cloud Platform
Machine Learning Frameworks: TensorFlow, Keras, OpenAI, Langchain, scikit-learn, Word2Vec, OpenCV
Database Technology: MS-SQL, Oracle, PostgreSQL, Firebase, MongoDB
Data Pipeline Frameworks: Airflow, pandas, Kafka, Vertex Pipeline

Architectures: LLM, Word2Vec, ARIMA, XGBoost, LightBGM, ResNet, VGG, CNN, RCNN, LSTM
Backend Technology: FastAPI, Flask, REST, JSON
Tools: SQL Server Management Studio, Alteryx
UI Technology: React, Bootstrap, jQuery
Soft Skills: Leadership & Motivation, Communication, Deadline handling, Analytical, Collaborative
Agile: Git, Bit-Bucket, Docker, Jira, Linux

PROGRAMMING

Python
C++
JavaScript
Java

PUBLICATIONS

Conference Proceedings

- "Finding Logo and Seal in Historical Document Images-An Object Detection Based Approach," in *Asian Conference on Pattern Recognition (ACPR 2019)*, Springer.
- "Bengali Place Name Recognition-Comparative Analysis Using Different CNN Architectures," in *Computer Vision and Image Processing: 5th International Conference (CVIP 2020)*, Springer.
- "Recognizing Bengali Word Images-A Zero-Shot Learning Perspective," in *International Conference on Pattern Recognition (ICPR 2021)*, IEEE.
