PRASHANT KUMAR PRASAD

AIML Engineer | Research Scholar

kr.prashant94@gmail.com +91 8083555868 Bangalore - 560100, India aruco.in
waytoprashant krprashant94

Innovative AI Engineer and Computer Science PhD Research Scholar with 6+ years of experience architecting cutting-edge AI solutions, including LLMs, agentic workflows, and deep learning models. Proven track record of designing scalable intelligent systems and chatbots. Certified in Machine Learning, Python, and Google Cloud, combining deep analytical expertise with strong technical leadership to drive cross-functional AI initiatives.

THINGS I KNOW

Machine Learning and Large Language Models (LLM)

- Experienced in Agentic AI architecture.
- Experience with OpenAI ChatGPT, LangChain, LangGraph and Hugging Face API. Skilled in creating LLM-based chatbots.
- Proven skill in supervised classification, recommendation, forecasting and chatbot design.
- Experienced in low-level design algorithms of language models.

Python

- Designed and implemented simple yet effective algorithms to address complex business requirements.
- Python libraries such as LangChain, langgraph, langsmith, pandas, numpy, nltk, TensorFlow, Keras, OpenCV

EXPERIENCE

American Express

Site Reliability Engineer II (AIML)

Nov-2025 – Ongoing Bangalore, India

- Developed an automated log analysis tool to monitor multi-application logs, engineering a system that triggers automated fallback mechanisms upon error detection.
- Integrated the Drain3 template mining framework for efficient log parsing and pattern extraction from unstructured data.
- Designed a data reduction algorithm to filter and compress log datasets, minimising storage overhead while preserving critical analytical insights.

Accenture

AIML Computational Science Sr Analyst

Oct-2024 – Nov-2025 Bangalore, India

- Spearheaded a high-priority AI for Business Intelligence (BI) initiative, architecting an agentic AI chatbot that enabled natural language "dialogue with data" and directly drove $250,000 in sales.
- Developed and deployed advanced Natural Language Processing (NLP) models for document Named Entity Recognition (NER) to automate data extraction workflows.
- Orchestrated end-to-end technical planning and execution, collaborating across teams to identify, analyze, and mitigate delivery risks.
- Managed source code repositories and streamlined deployment pipelines utilizing Azure Cloud infrastructure.

Infosys Limited

Digital Specialist Engineer

Sep-2020 – Oct-2024 Bangalore, India

- Leveraged Airflow, VertexAI, Pipeline, Model Registry, and Compute Engine technology in Google Cloud to deploy ML models.
- Implemented and deployed multiple conversational chatbots to fulfil various business requirements.
- Implemented an AI classifier that classifies 8000 classes on 8-35M dataset. Resulting in a 70% reduction in manual processing.
- Deployed a machine learning model in Google Cloud Storage Bucket for sales forecasting.
- Successfully deployed a scalable model for resume ranking, and matching against job descriptions, enhancing efficiency for job hiring team (Word2Vec, Keras, Ontology).

- Bug hunting and optimisation on the existing application.
- Communicated with the client and stakeholders to understand business requirements and formulate the problem statement. Presented the business solution to the client.

EDUCATION

PhD in Computer Science and Engineering (Part-Time)

National Institute of Technology Jamshedpur

Sep-2025 – present | Jamshedpur, India

B. Tech. in Computer Science and Engineering

RCC Institute of Information Technology (Maulana Abul Kalam Azad University of Technology)

Sep-2016 – July-2020 | Kolkata, India

B. Tech. Thesis: *"Word Recognition on Indic Script"*
DGPA: 8.33

Intermediate in Science

Mrs. K M P M Inter College (Jharkhand Academic Council)

2014 – 2016 | Jamshedpur, India

Percentage: 75.4%

CERTIFICATION

- Google Cloud Certified - Associate Cloud Engineer
- Google Cloud Certified - Cloud Digital Leader
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)

SKILLS

System Design | Python | Machine Learning | Large Language Model | TensorFlow | Keras

Cloud Technology: Hydra, VertexAI, Cloud Storage, Compute Engine, VM, Google Cloud Platform

Machine Learning Frameworks: LangGraph, Langchain, LangSmith, TensorFlow, Keras, OpenAI, scikit-learn, Word2Vec, OpenCV, nltk

Database Technology: MS-SQL, Oracle, Redis, PostgreSQL

Data Pipeline Frameworks: Airflow, pandas

Architectures: Agentic AI, RAG, Zero-Shot, Few-Shot, Prompt Engineering, Vector Datastore, LLM, Word2Vec, ARIMA, XGBoost, LightGBM, ResNet, VGG, CNN, RCNN, LSTM, AE

Backend Technology: FastAPI

Soft Skills: Leadership & Motivation, Communication, Deadline handling, Analytical, Collaborative

Other Skills: Git, Jira

PROGRAMMING

Python
C++
Java
JavaScript
